

Overview

TBi Connect is an Internet software product company based in Cheltenham, England. Founded in 2000, the company has grown from an established Consultancy and Software Development house to a business providing online services to hundreds of major corporates and trading partners through its Connect products.

We have invested six years in producing radical, core tools and technologies essential to the future of our business solutions and providing significant business advantage to our customers.

The board is led by our Chairman, David Rogers, former CEO of Amstrad, Lucent and PYE (Philips, Netherlands).

Backing the board, we are fortunate to have a group of highly experienced business executives and software leaders as the core of the management team.

TBi Connect

Aims

Lack of flexibility with legacy IT limits the introduction of new products, new sales initiatives and flexible procurement by increasing costs and imposing long delays.

Our aim is to work with you to deliver the most out of your legacy systems and to help you regain agility, flexibility and competitive advantage.

Connect is flexible, innovative and rapidly implemented. It is also highly scalable and directly tailored to your changing needs.

Focus

You have invested significantly in your SAP or Oracle systems over the past few years. Rapid changes in your business and your competitors mean that you need further ways to drive the business forward.

Now you find that your current processes either resist change or change is too costly and protracted to contemplate ...

TBi can help.

We provide dramatic improvement and control of major Sales and Procurement processes where our customers have struggled to solve a significant problem and where they need immediate, pragmatic and cost-effective business solutions to:

- Deliver the process flexibility and agility needed
- Drive out benefits expected from your ERP
- Establish and deliver benefits in just weeks
- Complement your existing SAP or Oracle solutions
- Maximise staff productivity
- Eliminate need to buy more hardware or software
- Maximise efficiency and reduce costs
- Adapt and flex rapidly to future needs

"From the outset we've designed Connect to provide the strategic advantages of flexibility, agility and rapidity that business constantly tell us they lack from their legacy systems."

*Simon Fox, CEO
